

THE AUSTRALIAN WAY TO BUILD

Explore modern architectural designs and interesting wall styles in fashionable paint colours.

DON'T BE ANOTHER BRICK IN THE WALL

Designed to stylishly brace timber frames, Scyon Walls are the antidote to dull cosmetic brick veneer.

The advanced cement composite of Scyon™ Walls can easily be gun-nailed to timber or screwed to steel frames. Scyon Walls are a faster and more modern way to achieve a resilient Australian home that oozes personality and style.

Most brick homes are simply clad in brick veneer while a timber frame provides the real structure.

SOAK UP THE OPEN SPACE

Bricks and cavities can reduce the floor space of a three bedroom home by up to 10 square metres.

Unlike brick veneer, Scyon™ Walls maximise floor space in renovations and new builds by allowing the frame to be positioned at the outer edge of the footings.

Imagine gaining enough space for an extra toilet, walk-in wardrobe or study nook by simply choosing smarter materials.

BUILD HOW YOU LIVE

Like our lifestyle, the Australian way to build embraces the open air, warming sun and ocean breeze.

Unlike Europe, where sub-zero temperatures have created a legacy of heavyweight masonry traditions, our climate liberates us from the need to build cave-like homes.

The use of lighter, modern building materials like Scyon™ Walls provides design freedom to make the most of our mild climate – revealing beautiful views and gardens.

KEEP YOUR OPTIONS OPEN

Scyon™ Walls make possible design options that heavyweight construction can only dream of.

Floating walls, overhangs, outdoor living areas and gravity-defying features like shade windows and cantilevers can create homes with countless personalities.

Once whites and greys are used to accentuate and recede features, materials like wood can add warmth to covered areas.

MIX THINGS UP

Like our choice of outfit, we express ourselves with the mix of materials and colour in our home.

By avoiding monotonous colours and materials, we transform our home into an interesting multi-chaptered story – delighting owners and passers-by alike. Homes, like those below that are broken down by expressive choices, earn themselves a distinctive street presence.

RE-INVENT A CLASSIC

**Build with materials that bridge
the divide between varied tastes.**

Weatherboard charms beach houses and country cottages Australia-wide. California Bungalows form stunning counterpoints to more modern uses of weatherboard.

Renowned for protecting Australian homes, Scyon™ Walls are perfectly offset by Axent™ Trim.

home or give your
renovation a modern twist
with Matrix™ cladding

FINDERS ARE SEEKERS

Having the freedom to explore different looks means our homes best reflect us.

Matrix™ cladding has as many application options as it does personalities. Whether it's the staggered joint effect or the geometric gridded look you're after, there's a Matrix configuration to match.

JUST ADD WATER

Because bathrooms are constantly drenched in water, the right protection is key to their longevity.

Scyon™ Secura™ Interior Floors provide a reliable, durable and water-resistant foundation for bathroom floor coverings.

Inspired by the unforgiving conditions outside, Secura harnesses the toughest elements of Australia's rugged landscape to provide the most solid of underfoot bases.

STRENGTH LIES BENEATH THE SURFACE

Durability can hinge on what you don't see.

Scyon™ Secura™ Exterior Floors are the ultimate lighter weight alternative for outdoor flooring underlay.

This choice minimises weight on balconies and cantilevers, preserving water resistance and providing protection from the harsh Australian elements.
